Senior Management Arrangements, Systems and Controls ("SYSC")

2.5 SYSC 3.2.6E provides:

2.6 SYSC 3.2.6R provides:

"A firm must take reasonable care to establish and maintain effective systems and controls for compliance with applicable requirements and standards under the regulatory system and for countering the risk that the firm might be used to further financial crime."

2.7 SYSC 6.1.1R provides:

"A firm must establish, implement and maintain adequate policies and procedures sufficient to ensure compliance of the firm including its managers, employees and appointed representatives (or where applicable, tied agents) with its obligations under the regulatory system and for countering the risk that the firm might be used to further financial crime."

2.8 SYSC 6.3.1R provides:

A firm must ensure the policies and procedures established under SYSC 6.1.1 R include systems and controls that:

- (2) are comprehensive and proportionate to the nature, scale and complexity of its activities.

2.9 SYSC 6.3.6 provides:

 - (a) the development of new products;
 - (b) the taking-on of new customers; and
 - (c) changes in its business profile".

2.11 SYSC 9.1.1R provides:

"A firm must arrange for orderly records to be kept of its business and internal organisation, including all services and transactions undertaken by it, which must be sufficient to enable the appropriate regulator or any other relevant competent authority under MiFID or the UCITS Directive to monitor the firm's compliance with

the requirements under the regulatory system, and in particular to ascertain that the firm has complied with all obligations with respect to clients."

Enforcement Guide

2.17 The Enforcement Guide sets out the Authority's approach to taking disciplinary action. The Authority's approach to financial penalties and suspensions (including restrictions) is set out in Chapter 7 of the Enforcement Guide.

3. JMLSG GUIDANCE – PART I (dated 19 November 2014)

A risk-based approach – governance, procedures and internal controls

3.1 JMLSG Paragraph 4.5 provides:

"A risk-based approach requires the full commitment and support of senior management, and the active co-operation of business units. The risk-based approach needs to be part of the firm's philosophy, and as such reflected in the procedures and controls. There needs to be a clear communication of policies and procedures across the firm, along with the robust mechanisms to ensure that they are carried out effectively, weaknesses are identified, and improvements are made wherever necessary."

3.2 JMLSG Paragraph 4.6 provides:

"Although the ML/TF risks facing the firm fundamentally arise through its important that the firm considers its customer risks in the context of the wider ML/TF environment inherent in the jurisdictions in which the firm and its customers operate. Firms should bear in mind that some jurisdictions have close links with other, perhaps higher risk jurisdictions, and where appropriate and relevant regard should be had to this."

3.3 JMLSG Paragraph 4.9 provides:

"The procedures, systems and controls designed to mitigate assessed ML/TF risks should be appropriate and proportionate to these risks, and should be designed to provide an effective level of mitigation."

3.4 JMLSG Paragraph 4.12 provides:

"A risk-based approach takes a number of discrete steps in assessing the most cost effective and proportionate way to manage and mitigate the money laundering and terrorist financing risks based by the firm. These steps are to:

- *identify the money laundering and terrorist financing risks that are relevant to the firm;*
- *assess the risks presented by the firm's particular*
- *customers and any underlying beneficial owners*;*

- *products;*
- *delivery channels;*
- *geographical areas of operation;*
- *design and implement controls to manage and mitigate these assessed risks, in the context of the firm's risk appetite;*
- *monitor and improve the effective operation of these controls; and*
- *record appropriately what has been done, and why.*

* In this Chapter, references to 'customer' should be taken to include beneficial owner, where appropriate."

3.5 JMLSG Paragraph 4.13 provides:

"Whatever approach is considered the most appropriate to the firm's money laundering/terrorist financing risk, the broad objective is that the firm should know at the outset of the relationship who their customers are, where they operate, what they do, their expected level of activity with the firm and whether or not they are likely to be engaged in criminal activity. The firm then should consider how the profile of the customer's financial behaviour builds up over time, thus allowing the firm to identify transactions that may be suspicious."

3.6 JMLSG Paragraph 4.20 provides:

"In reaching an appropriate level of satisfaction as to whether the customer is acceptable, requesting more and more identification is not always the right answer – it is sometimes better to reach a full and documented understanding of what the customer does, and the transactions it is likely to undertake. Some business lines carry an inherently higher risk of being used for ML/TF purposes than others."

3.7 JMLSG Paragraph 4.21 provides:

"However, as stated in paragraph 5.2.6, if a firm cannot satisfy itself as to the identity of the customer; verify that identity; or obtain sufficient information on the nature and intended purpose of the business relationship, it must not enter into a new relationship and must terminate an existing one."

3.8 JMLSG Paragraph 4.22 provides:

"While a risk assessment should always be performed at the inception of a customer relationship (although see paragraph 4.16 below), for some customers a comprehensive risk profile may only become evident once the customer has begun transacting through an account, making the monitoring of transactions and on-

going reviews a fundamental component of a reasonably designed RBA. A firm may also have to adjust its risk assessment of a particular customer based on information received from a competent authority."

3.9 JMLSG Paragraph 4.25 provides:

"For firms which operate internationally, or which have customers based or operating abroad, there are additional jurisdictional risk considerations relating to the position of the jurisdictions involved, and their reputation and standing as regards the inherent ML/TF risk, and the effectiveness of their AML/CTF enforcement regime."

3.10 JMLSG Paragraph 4.50 provides:

"Where a customer is assessed as carrying a higher risk, then depending on the product sought, it will be necessary to seek additional information in respect of the customer, to be better able to judge whether or not the higher risk that the customer is perceived to present is likely to materialise. Such additional information may include an understanding of where the customer's funds and wealth have come from. Guidance on the types of additional information that may be sought is set out in section 5.5."

3.11 JMLSG Paragraph 4.51 provides:

"Where the risks of ML/TF are higher, firms must conduct enhanced due diligence measures consistent with the risks identified. In particular, they should increase the degree and nature of monitoring of the business relationship, in order to determine whether these transactions or activities appear unusual or suspicious. Examples of EDD measures that could be applied for higher risk business relationships include:

- *Obtaining, and where appropriate verifying, additional information on the customer and updating more regularly the identification of the customer and any beneficial owner*
- *Obtaining additional information on the intended nature of the business relationship*
- *Obtaining information on the source of funds or source of wealth of the customer*
- *Obtaining information on the reasons for intended or performed transactions*
- *Obtaining the approval of senior management to commence or continue the business relationship*

- *Conducting enhanced monitoring of the business relationship, by increasing the number and timing of controls applied, and selecting patterns of transactions that need further examination*
- *Requiring the first payment to be carried out through an account in the customer's name with a bank subject to similar CDD standards"*

3.12 JMLSG Guidance paragraph 4.61 provides:

"Firms must document their risk assessments in order to be able to demonstrate their basis, keep these assessments up to date, and have appropriate mechanisms to provide appropriate risk assessment information to competent authorities."

Enhanced due diligence

3.13 JMLSG Paragraph 5.5.1 provides:

"A firm must apply EDD measures on a risk-sensitive basis in any situation which by its nature can present a higher risk of money laundering or terrorist financing. As part of this, a firm may conclude, under its risk-based approach, that the information it has collected as part of the customer due diligence process (see section 5.3) is insufficient in relation to the money laundering or terrorist financing risk, and that it must obtain additional information about a particular customer, the customer's beneficial owner, where applicable, and the purpose and intended nature of the business relationship."

3.14 JMLSG Paragraph 5.5.4 provides:

"In practice, under a risk-based approach, it will not be appropriate for every product or service provider to know their customers equally well, regardless of the purpose, use, value, etc. of the product or service provided. Firms' information demands need to be proportionate, appropriate and discriminating, and to be able to be justified to customers."

3.15 JMLSG Paragraph 5.5.5 provides:

"A firm should hold a fuller set of information in respect of those business relationships it assessed as carrying a higher money laundering or terrorist financing risk, or where the customer is seeking a product or service that carries a higher risk of being used for money laundering or terrorist financing purposes."

3.16 JMLSG Paragraph 5.5.6 provides:

"When someone becomes a new customer, or applies for a new product or service, or where there are indications that the risk associated with an existing business relationship might have increased, the firm should, depending upon the nature of the product or service for which they are applying, request information as to the customer's residential status, employment and salary details, and other sources of income or wealth (e.g., inheritance, divorce settlement, property sale), in order to decide whether to accept the application or continue with the relationship. The firm should consider whether or not there is a need to enhance its activity monitoring in respect of the relationship. A firm should have a clear policy regarding the escalation of decisions to senior management concerning the acceptance or continuation of high-risk business relationships."

3.17 JMLSG Paragraph 5.5.9 provides:

"The ML Regulations prescribe three specific types of relationship in respect of which EDD must be applied. They are:

- *where the customer has not been physically present for identification purposes (see paragraphs 5.5.10ff);*
- *in respect of a correspondent banking relationship (see Part II, sector 16: Correspondent banking);*
- *in respect of a business relationship or occasional transaction with a PEP (see paragraph 5.5.18ff)."*

Reliance on third parties

3.18 JMLSG Paragraph 5.6.4 provides:

"The ML Regulations expressly permit a firm to rely on another person to apply any or all of the CDD measures, provided that the other person is listed in Regulation 17(2), and that consent to be relied on has been given (see paragraph 5.6.8). The relying firm, however, retains responsibility for any failure to comply with a requirement of the Regulations, as this responsibility cannot be delegated."

3.19 JMLSG Paragraph 5.6.14 provides:

"Whether a firm wishes to place reliance on a third party will be part of the firm's risk-based assessment, which, in addition to confirming the third party's regulated status, may include consideration of matters such as:

- *its public disciplinary record, to the extent that this is available; the nature of the customer, the product/service sought and the sums involved; any adverse experience of the other firm's general efficiency in business dealings; any other knowledge, whether obtained at the*

outset of the relationship or subsequently, that the firm has regarding the standing of the firm to be relied upon."

3.20 JMLSG Paragraph 5.6.16 provides:

"In practice, the firm relying on the confirmation of a third party needs to know:

- *the identity of the customer or beneficial owner whose identity is being verified; the level of CDD that has been carried out; and confirmation of the third party's understanding of his obligation to make available, on request, copies of the verification data, documents or other information.*

In order to standardise the process of firms confirming to one another that appropriate CDD measures have been carried out on customers, guidance is given in paragraphs 5.6.30 to 5.6.33 below on the use of pro-forma confirmations containing the above information."

3.21 JMLSG Paragraph 5.6.24 provides:

"A firm must also document the steps taken to confirm that the firm relied upon satisfies the requirements in Regulation 17(2). This is particularly important where the firm relied upon is situated outside the EEA."

3.22 JMLSG Paragraph 5.6.25 provides:

"Part of the firm's AML/CTF policy statement should address the circumstances where reliance may be placed on other firms and how the firm will assess whether the other firm satisfies the definition of third party in Regulation 17(2) (see paragraph 5.6.6)."

Ongoing Monitoring

JMLSG Paragraph 5.7.1 provides:

"Firms must conduct ongoing monitoring of the business relationship with their customers. Ongoing monitoring of a business relationship includes:

- *Scrutiny of transactions undertaken throughout the course of the relationship (including, where necessary, the source of funds) to ensure that the transactions are consistent with the firm's knowledge of the customer, his business and risk profile;*
- *Ensuring that the documents, data or information held by the firm are kept up to date."*

3.23 JMLSG Paragraph 5.7.2 provides:

"Monitoring customer activity helps identify unusual activity. If unusual activities cannot be rationally explained, they may involve money laundering or terrorist financing. Monitoring customer activity and transactions that take place throughout a relationship helps firms know their customers, assist them to assess risk and provides greater assurance that the firm is not being used for the purposes of financial crime."

3.24 JMLSG Paragraph 5.7.3 provides:

"The essentials of any system of monitoring are that:

- *it flags up transactions and/or activities for further examination;*
- *these reports are reviewed promptly by the right person(s); and*
- *appropriate action is taken on the findings of any further examination.*

3.25 JMLSG Paragraph 5.7.4 provides:

"Monitoring can be either:

- *in real time, in that transactions and/or activities can be reviewed as they take place or are about to take place, or*
- *after the event, through some independent review of the transactions and/or activities that a customer has undertaken*

and in either case, unusual transactions or activities will be flagged for further examination."

3.26 JMLSG Paragraph 5.7.7 provides:

"In designing monitoring arrangements, it is important that appropriate account be taken of the frequency, volume and size of transactions with customers, in the context of the assessed customer and product risk."

3.27 JMLSG Paragraph 5.7.8 provides:

"Monitoring is not a mechanical process and does not necessarily require sophisticated electronic systems. The scope and complexity of the process will be

influenced by the firm's business activities, and whether the firm is large or small. The key elements of any system are having up-to-date customer information, on the basis of which it will be possible to spot the unusual, and asking pertinent questions to elicit the reasons for unusual transactions or activities in order to judge whether they may represent something suspicious."

JMLSG Part II – Wholesale Markets (dated 19 November 2014)

Types of Risk

3.28 JMLSG Part 2 Paragraph 18.14 provides:

"OTC and exchange-based trading can also present very different money laundering risk profiles. Exchanges that are regulated in equivalent jurisdictions, are transparent and have a central counterparty to clear trades, can largely be seen as carrying a lower generic money laundering risk. OTC business may, generally, be less well regulated and it is not possible to make the same generalisations concerning the money laundering risk as with exchange-traded products. For example, trades that are executed as OTC but then are centrally cleared, have a different risk profile to trades that are executed and settled OTC. Hence, when dealing in the OTC markets firms will need to take a more considered risk-based approach and undertake more detailed risk-based assessment."

3.29 JMLSG Part 2 Paragraph 18.21 provides:

"Firms may also wish to carry out due diligence in respect of any introducing brokers who introduce new customers or other intermediaries and consider whether there are any red flags in relation to corruption risks."

ANNEX C: 401(k) Pension Plans

Employer Created 401(k) Plans

A 401(k) is a qualified profit sharing plan that allows employees to contribute a portion of their wages to individual retirement accounts. Employers can also contribute to employees' accounts. Any money that is contributed to a 401(k) below the annual contribution limit is not subject to income tax in the year the money is earned, but then is taxable at retirement. For example, if John Doe earns \$100,000 in 2018, he is allowed to contribute \$18,500, which is the 2018 limit, to his 401(k) plan. If he contributes the full amount that

he is allowed, then although he earned \$100,000, his taxable income for income tax purposes would be \$81,500. Then, he would pay income tax upon any money that he withdraws from his 401(k) at retirement. If he withdraws any money prior to age 59 1/2, he would be subject to various penalties and taxes.

Contribution to a 401(k) plan must not exceed certain limits described in the Internal Revenue Code. The limits apply to the total amount of employer contributions, employee elective deferrals and forfeitures credits to the participant's account during the year. The contribution limits apply to the aggregate of all retirement plans in which the employee participates. The contribution limits have been increased over time. Below is a chart of the contribution limits:

| Year | Employee Contribution Limit | Employer Contribution Limit | Total Contribution | Catch Up Contribution (only for individuals Age 50+) |
|------|-----------------------------|-----------------------------|--------------------|--|
| 1999 | \$10,000 | \$20,000 | \$30,000 | 0 |
| 2000 | \$10,500 | \$19,500 | \$30,000 | 0 |
| 2001 | \$10,500 | \$24,500 | \$35,000 | 0 |
| 2002 | \$11,000 | \$29,000 | \$40,000 | \$1,000 |
| 2003 | \$12,000 | \$28,000 | \$40,000 | \$2,000 |
| 2004 | \$13,000 | \$28,000 | \$41,000 | \$3,000 |

Minimum Age Requirements

In the United States, the general minimum age limit for employment is 14. Because of this, an individual may make contributions into 401(k) plans from this age if the terms of

the plan allow it. The federal government does not legally require employers to include employees in their 401(k) plans until they are at least 21 years of age. If you are at least 21 and have been working for your employer for at least one year, your employer must allow you to participate in the company's 401(k) plan. As a result, some employers' plans will not allow individuals to invest until they are at least 18 or 21 depending upon the terms of the plan.

One-Participant 401(k) Plans

A one-participant 401(k) plan are sometimes called a solo 401(k). This plan covers a self-employed business owner, and their spouse, who has no employees. These plans have the same rules and requirements as other 401(k) plans, but the self-employed individual wears two hats, the employer and the employee.
